Project Demo Planning

Project details

Field	Details
Date	27 October 2026
Team ID	EN25CS3010349
Project Name	Electric Vehicle Market Analysis Using Tableau
Maximum Marks	1 Mark

Project Demo Planning

A well-structured demonstration plan ensures that the Electric Vehicle Market Analysis Using Tableau project is presented clearly and effectively. The demonstration will cover the project objective, dataset, data visualization process, interactive dashboards, key findings, and conclusions. It will explain how Tableau transforms electric vehicle market data into meaningful insights related to sales, vehicle categories, manufacturers, battery technologies, charging efficiency, and environmental impact.

1. Demo Sections

Enter the following information into the first table.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the EV market analysis project, its objectives, and the problem of analyzing large amounts of EV market data.	1	Gamishta Gupta
2	Solution Overview	Explain the dataset, Tableau tools, data preparation, and the purpose of the visualizations.	1	Gamishta Gupta
3	Market Performance Dashboard	Demonstrate KPI cards, sales by category, manufacturer performance, driving range, and retained value.	2	Gamishta Gupta
4	Technology & Impact Dashboard	Demonstrate sales trends, battery technology performance, charging versus efficiency, and regional CO□ savings.	2	Gamishta Gupta
5	Key Findings & Insights	Present the main observations from the dashboards and explain their business significance.	1	Gamishta Gupta

6	Conclusion & Q&A	Summarize the project outcomes, explain its benefits, and answer questions.	1	Gamishta Gupta

Total demo duration: 8 minutes

2. Demo Flow Summary

Fill the second table like this.

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the project, explain the need for EV market analysis, and state the main objectives.
2	Solution Overview	Explain the dataset, Tableau workflow, and the two dashboards created for market performance and technology and environmental impact.
3	Live Feature Demonstration	Show the KPI cards, sales by category, manufacturer analysis, range, retained value, sales trends, battery technology, charging efficiency, and regional environmental impact. Demonstrate filters and tooltips where available.
4	Q&A Session	Summarize the key insights, discuss project limitations, and answer questions about the visualizations and findings.
